

## Experienced compliance and finance manager - *unlocking potentials and driving change*

My professional background is based on senior management within Finance and Compliance in global production companies like Burmeister & Wain, Hempel, FLSmidth and Vestas for 25+ years – in Denmark and abroad. I am currently working for Maersk, Compliance / COMMIT programme - UK Bribery Act.

I sat on the board of the Hempel Foundation as staff elected representative. I have finalised Netværk Danmark's executive programme in strategy & management

My core competences are:

Working internationally, breaking down silo's – getting the business onboard

- Finance: strategies, budgets, consolidation, month – and yearend closing
- Compliance: management, COSO, UK Bribery act & Quality
- Implementation: ERP, Strategy, Shared Service Centers, Change & Communication

Main mantra : Keep it simple

The common denominator in my professional career is "clean-up", process optimisation, management, change- and project management, implementation and communication – always from a risk angle and stakeholder expectations.

I am driven by creating value for the people and companies I work with, through strategic and holistic thinking, - international understanding and a big portion of curiosity. I have a strong business understanding across functions and geography. Some of the key achievements and challenges I have been involved in:

- Turnaround of sinking projects: compliance programmes, ERP and Shared Service Centres
- Turnaround of Hempel (USA) – breaking the loss curve as part of the management group
- Building strong and motivated teams

I can contribute with a great business insight, know my way around processes and stakeholders, from master data to audit committee reporting, across most functions.

I have a keen interest in Danish and International business. I am a mentor in Nydansker.dk, love to travel and get new input, I am a positive person with a curious mind on what makes people tick.

### **Motivation**

- Share my experience working internationally and with various cultures
- Act as sparring, mentor, inspiration – AND ask the tough questions
- Be a role model for women  
– and take the fear out of "Compliance, Governance and Gap analysis"
